Personal Details

Date of Birth: 10th October, 1999.

Nationality: Ghanaian

Gender: Male

Career Objective

A Software Developer focused on building scalable, secure, and high-performance web applications. Over the past three years, my work has progressed beyond writing code to engineering practical solutions, from role-based data management systems to transaction-driven platforms built for reliability and scale. My expertise spans MongoDB, Express.js, Angular, and Node.js, enabling me to deliver seamless end-to-end solutions across both frontend and backend systems. With a strong command of TypeScript and modern JavaScript principles, I approach new technologies with flexibility and a problem-solving mindset. I enjoy collaborating in cross-functional teams to turn complex requirements into intuitive, efficient, and scalable digital products.

Professional Experience

- August 2025 – present: **Software Developer at Vandzilah Technology, Accra-Ghana.**

Projects

Ghana National Arms Management Portal

(<https://ianannoh.vercel.app/projects/ggrs>):

- Followed UX/UI design to develop a responsive frontend using Angular.
- Implement secure user authentication.
- Integrated backend APIs with frontend.
- Ensure security by allowing functionality depending on user role.

Vandzilah Technology CMS (<https://ianannoh.vercel.app/projects/vdt-cms>):

- Designed and developed the end-to-end CRUD APIs using Node.js, Express, and MongoDB.
- Developed a responsive frontend.
- Integrated backend with frontend to allow ease of use.
- Functionalities include CRUD functionality for staff data, blogs and job vacancies.

Vitals First (<https://ianannoh.vercel.app/projects/vitals-first>):

- Implement secure user authentication.
- Dashboard design to view both patient and clinic statistics.
- Ensure security by allowing functionality depending on user role.
- Implement automated patient-to-clinic data routing.

First Responder Ghana Website (<https://firstresponderapp.org/>)

Developed a responsive user portal, integrated with secure, high-volume donation pipelines supporting both one-time and recurring payment processing hooks.

Vandzilah Technology Website (<https://vandzilahtechnologies.com/>)

Developed a responsive portfolio website showcasing the company's projects and services. Careers section allows users to fill forms that are delivered to company's human resource department.

DaaS Website (<https://daas.vandzilahtechnologies.com/>)

Development as a Service website provides details on subscribing to Vandzilah Technology's website and app development as a service. It also contains a feature to check for available domains.

- May 2022 – July 2025: **Freelance Software Developer Projects**

Ess By Fee (E-Commerce Platform):

Engineered a high-performance, mobile-first e-commerce web application featuring dynamic product filtering, a multi-step checkout workflow, and real-time cart state updates.

Leveraged reactive programming patterns (RxJS) to manage application state seamlessly, drastically minimizing unnecessary component re-renders.

YelpCamp:

Built a scalable web application allowing users to upload, review, and search for local hotels, lodges, and restaurants.

Ian Annoh

Post office Box 14559, Accra.

ianannoh32@icloud.com, +233 54 720 6496

Designed a secure database schema using MongoDB and Mongoose, utilizing relational referencing for user reviews and geolocations.

Educational Background

- October 2017-August 2021: **Bachelor of Science (BSc) in Earth Science, University of Ghana-Legon, Accra.**
- September 2022-December 2022: **Completed a 6-month course on Web Development on Udemy.**
- February 2024 – present: **Bachelor of Science (BSc) in Information Technology, University of Ghana-Legon, Accra.**
- October 2014 - May 2017: **West African Senior Secondary Certificate Examination (WASSCE, Science Option) Presbyterian Boys Senior High School, Legon, Accra**
- June 2014: **Basic Education Certificate Examination (BECE) Saint Mark Preparatory School, Agege, Accra**

Professional Competence and Skills

Languages:

- TypeScript
- JavaScript
- Java
- SQL

Frontend:

- Angular
- React

Ian Annoh

Post office Box 14559, Accra.

ianannoh32@icloud.com, +233 54 720 6496

- Bootstrap

Backend:

- NodeJS
- Express

Databases:

- MongoDB
- SQL

Practices:

- Agile
- CI/CD
- Git

Hobbies

- Reading
- Engaging in sporting activities (basketball and football)
- Music
